<div style="display: flex; align-items: center; justify-content: center;">  <div style="margin-left: 20px;"> <div style="border: 1px solid black; padding: 5px; display: inline-block;">Circle A</div> <div style="border: 1px solid black; padding: 5px; display: inline-block;">Circle B</div> </div> </div> <p style="text-align: center;">(Big)</p>													

.....

V. Comprehension(4)

How did all the planets get there? How is it only our planet has life? Will we ever travel to other planets? These are questions I often think about. I think our planet is the best. It looks so beautiful from space with its mixture of blue and green. The other planets look too strange to me. Mercury is just a red, hot ball, pretty much the same as Mars. Saturn looks like a real planet. Its rings give it an extra-special look. The other planets don't look that interesting. I don't really know much about Venus, Neptune, Uranus and Jupiter. When I was at school, we learnt that Pluto was a planet. But now it isn't. Scientists have decided there are now only eight planets in our solar system and not nine. I wonder why they dropped Pluto.

1) What's the difference between past and nowadays knowledge of writer?

2) How many planets were in solar system?

3) Our planet is strange too. True False

4) The earth is not interesting. True False

5) Mars is different from Mercury. True False

6) The writer _____

A) Is unaware about five other planets.

B) Thinks Pluto is still a planet.

C) Is interested in knowing or learning about space and solar system.

D) Finally will travel to other planet.
